BERLIN EMBROIDERY DESIGNS METAL THREAD LIST 2012

You can place an order over my website for metal threads.

<http://www.berlinembroidery.com/goldworksupplies.htm>

**If you are ordering a large amount of threads you may find
using this list quicker than the website.**

**The cost of the metal threads are by the inch, yard,
skein or gram. You can use this list to place a metal threads order.
Copy the threads you would like to order from the list into an email
and type in the amount of inches, yards, skeins or grams
that you require and the total and then email it to:**

tanja@berlinembroidery.com

Email is preferred to letter mail as it is quicker to confirm the requirements.

**Prices may change and metal threads maybe added or taken from the list so check my
website for current prices and threads:**

METAL THREAD PRICES

What is the difference between Gold 2% WM and Gilt?

Gold 2% WM is the highest standard gold thread that can be purchased for Goldwork. 2% gold is also known as Admiralty or Government standard and are 2% gold plating on white metal (WM) - silver plated copper. Gold 2% is a brighter and truer in colour to real gold than the Gilt metal threads.

Gilt is about ½ % of Gold on silver plated copper. Gilt metal threads are similar in appearance to the Gold 2% but Gilt tends to be more yellow in colour and stretchier than the Gold 2%.
